DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

- Canceled withdrawn (non-elected) claims 22-24 (Election without traverse).

Allowable Subject Matter

2. Claims 18-21, 27-31, 33 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

With regard to claim 18, the prior art of records fail to teach or suggest a non-volatile memory element particularly with an SiC surface structure and a first insulator barrier layer as in the combination of other elements of the claim. In another words, the prior art teaches an interface control layer of Group-III nitride layer and a floating gate layer formed of a metal or a semiconductor quantum well. However, the prior art lacks a first insulation barrier layer. Furthermore, the prior art's interface control layer and floating gate layer are not particularly a SiC surface structure as required by the claim.

With regard to claim 27, the prior art of record fail to teach or suggest a nonvolatile memory element particularly with an SiC surface structure and a second insulator barrier layer, and said second insulator barrier layer is formed of a Group-III nitride epitaxial layer as in the combination of the other elements of the claim. In another words, the prior art teaches a first insulation barrier layer of Group-III nitride layer and a well layer formed of a Group-III nitride layer. However, the prior art lacks a second insulation barrier layer and said second insulator barrier layer is formed of a Group-III nitride epitaxial layer. Furthermore, the prior art's first insulation barrier layer and well layer are not particularly a SiC surface structure as required by the claim.

The corresponding dependent claims are allowable for at least the same reason as base claims.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
 - US-7005344: The invention teaches related memory device yet fail to teach or suggest particularly with an SiC surface structure and a first insulator barrier layer or a second insulator barrier layer and said second insulator barrier layer is formed of a Group-III nitride epitaxial layer as in the claimed device.
